*12th - Science - **Percentage** - **52%***   *koraput, Odisha*

COURSEWORK / SKILLS

- Frontend Development
- Database Management System (DBMS)
- OOPS Concept
- Web Development

PROJECTS

Web Clone's ⌤ |

- Developed a responsive Netflix clone using HTML, CSS (Tailwind CSS).including responsive design and cross-browser to provide seamless viewing experience across all devices .
- Developed an Instagram-like web application using Django, HTML, CSS, and JavaScript, implementing dynamic page routing, user authentication, and database management to enable post uploads, follow/unfollow, real-time chat, comments, likes, post-saving, and profile editing—mirroring core social media functionalities.
- Developed a Bank Management System using Django featuring dynamic page routing, OTP authentication via email, and automated transaction alerts (deposits/withdrawals/money transfer) to enhance user security and engagement .
- Built a pixel-perfect Mercedes-Benz website clone using modern frontend technologies (HTML, CSS, JavaScript), replicating UI/UX elements, animations, and responsive design to deliver a seamless user experience .

Bootcamp Project ⌤ |

- Developed a robust authentication system using JWT (JSON Web Tokens) to securely manage user login, registration, and session persistence.
- Designed and implemented a multi-page application using React Router for seamless navigation and dynamic routing.
- Integrated RESTful APIs: Connected the frontend with backend APIs to fetch and manage data, enabling features like user profiles, course enrollment, and progress tracking.

Object Detection & it's Counting(Final year project) ⌤ |

- Worked in Major project
- My Role in this project is Front-End Developer.
- Technical Languages Used are Python, Yolo Algorithm.

TECHNICAL SKILLS

Languages: Python, HTML, CSS, JavaScript, Typescript, Tailwind CSS, GSAP Animation, SQL, Mongo Db, Express js
Developer Tools: VS Code, EditPlus
Technologies/Frameworks: ReactJS, Django

CERTIFICATIONS

- Python Full Stack(Web Technology, sql, python, Django) - PySpider(Punjagutta)
